About This Game

Drive trains, shunt waggons, load freight

'EEP Train Simulator Mission' transports you into the complex railway worlds of **Eisenbahn.exe Professional (EEP)**. Except that you don't design these worlds, like you would with the main program, but instead take on challenging tasks in realistic scenarios.

- True in scale engines and waggons
- Realistic simulation of train physics
- Prototypical signalling
- Freight operation
- Exciting missions
- Career mode

Do you have the skill and strength of nerve to sort waggons in a hump yard? Can you deliver a refrigerator wagon to the cool house in time? Can you keep track of the traffic on the main line and master the trickiest of shunting tasks? Great - you're just

the man we need! Your rewards are adventures and new challenges in the unique world of EEP, as well as access to a wide range of interesting engines and waggons. Version 1.0 of '**EEP TS Mission**' offers a complete campaign with many tasks.

EEP TS Mission offers a realistic simulation of train physics, a rich sound environment and for the future a wide range of connections. Because we're planning for frequent releases of additional scenarios with new exciting and challenging missions.

Welcome to the universe of EEP

For over **20 years (!)** **EEP** is renowned as the most comprehensive railway simulation for PCs, focussing on the design of beautiful and fully functional railway layouts. EEP lets you form the landscape with mountains, valleys and rivers and populate it with buildings and track networks. A cleverly devised signalling system allows you to organize the traffic. And the sheer endless variety of models enables you to design railway layouts of nearly every kind.

For the true railway enthusiast with an interest in realistic creation and complex operation of railway layouts, there is no alternative. If there is one thing missing in EEP, it is the opportunity to experience these EEP worlds from within. Which is what **EEP TS Mission** offers!

Experience at first hand the rich and realistic atmosphere of EEP by taking on the role of a train conductor, shunting engineer, crane operator or train dispatcher.

For small children. Not sure it's even fun for them,. Fun game. Problems with getting fullscreen without issues . I just wait until main title screen to even try it. But anyway somewhat fun button masher. Uncensor game, damn commy i want to see Mrs. \u2665\u2665\u2665\u2665\u2665.

<https://www.youtube.com/watch?v=3B5BD60a69M>. It's kind of like a love child between the F-zero and WipeOut series. Lots of speed, racing, and battling on track, although a majority of the time you'll spend trying to swerve onto the boost panels to retain any sort of speed. Not a bad game for the price. Controller support is always nice.. What a terrible game, it's great!. game doesnt even download.. I can't wait for the full game. I played this game alone, and it had me on my toes the whole time.

A very fun little game i recomend it for beginners in the strategy genre, but even seasoned strategy fans can enjoy the moderate challenge this game provides.. It's really hard to pin this game into a genre. It's an exploratory puzzle game, but feels kinda like an idle game and definitely has a storyline. It's uinique and quirky and if that sounds like something you might be interested in, I recommend it.

You can see my first impression playthrough here:

<https://www.youtube.com/watch?v=c1ER8sdCeF4>. Um. Where the H E double hockey sticks has this game been hiding for 4 years?

Cool game indeed. Looking forward to hours and hours of more game play!. I love the Commands & Colors boardgames. However I cant recommend this as there are too many bugs. Several times the cards dont work. The UI has visual bugs. On top of this the graphics and sound are not very good. The price is too high for a product of this quality.. This game is so hard. Very challenging, but in a fair way. Works on Oculus Rift with Touch. Do need roomscale setup.

Sale Price Rating 7/10. Good deal for \$1.49; Normal Price Rating 5/10.

Note: there are 2 free games on Steam VR that are very similar but this one has the most polish IMHO. Refunded - Shmups are one of my fave game types but no one seems to understand the importance of non flashy visuals, if i cant see enemy bullets clearly because of oer the top graphic fx its not a proper shmup, i had high hopes due to similarities to rtype in the visuals but find the controls sluggish and game not challenging enough for the genre. Really Interesting, hit detection is good. Only thing is being that its a new game lobbies are usually 1v1 or maybe 2v2. Still very fun for being such a small lobby. Only thing i will say that needs work though is the respawning system. In the game mode similar to Capture the Flag, the spawns got flipped to where we started spawing at the oposing teams base which made it real easy to start scoring. This game has potential and with it costing so little it has come a long way already
